

Product Information

STEERING BOX LUBE

Codes: SBL0005

Issue: January 2010

Penrite Steering Box Lube is an extreme pressure, polymer grease, blended using a high viscosity base oil and effective anti-wear, rust and oxidation inhibitors.

Normal ambient operating temperature is from 0 °C to 80 °C.

APPLICATIONS

Penrite Steering Box Lube may be used in the following applications:

- Veteran and Vintage motorcycle and car gear boxes and steering boxes.
- Trailer bearing hubs where heavy oils are specified and leakage is a problem
- Chain cases
- Slow speed industrial gear boxes where AGMA 7EP (ISO 460 and above) or heavier oils are specified
- Leaky gear boxes
- Reduction gear boxes in slasher mowers

CUSTOMER BENEFITS

- Extends bearing and gear life by minimising wear and shock loads
- Does not splash so maximises lubrication efficiency
- Resists leakage even under heavily loaded conditions
- Resists squeeze out
- Good low and high temperature fluidity
- Protects against rust and corrosion
- Good water resistance
