

HEAVY DUTY DIESEL ENGINE OILS – COMPLETED

To complete the upgraded diesel engine oil range, Penrite have now released one of the most advanced products on the market for the ultimate in engine protection.

Penrite Diesel SP

The specifications speak for themselves.

Penrite Diesel SP is a SAE 10W-40 synthetic performance product that meets API CI-4, ACEA E4/E6/E7, MB 228.51 and many others. It is designed for the ultra long drain requirements of European trucks and buses including those fitted with exhaust particulate filters and SCR (AdBlue) emission control systems. Compared to the old Euro 15, Diesel SP can provide longer oil drain periods (up to 100,000km) in European trucks. The CI-4 rating also means US trucks can benefit from Diesel SP and oil inventories can be simplified. **Code DSP020, DSP205.**

So no matter what your fleet, Penrite has you covered.
