

**TECHNICAL BULLETIN**  
**No 127, MAY 2008**

## ***ATF SYNTHETIC NOW ATF FM5***

Please note that our Ford MERCON<sup>®</sup>-V approved product ATF Synthetic is now called:

### ***ATF FM5***

The bar code for the 4L pack is the same as for ATF Synthetic and the label carries through the same green colour scheme.

This has been done to alleviate the confusion between ATF Synthetic and SIN Auto Fluid which are different products.

ATF FM5 will only be available in 4L packs and will phase in as stocks of ATF Synthetic are depleted.

In the short term, ATF Synthetic will remain available in 20L drums (with a thermal label) pending some exciting news for SIN Auto Fluid.
