

UPGRADE OF HPR DIESEL RANGE

Please replace Bulletin 152.

Penrite have taken the major step in upgrading HPR Diesel 15 to API CI-4.

At the same time, it has enabled us to regain ACEA A3/B4 to ensure compliance with the now current ACEA 2008 specifications. Product currently labelled as ACEA A3/B3 is actually compliant with ACEA A3/B4 2007 specifications (which expire at the end of 2010) so in effect we did not actually lose the "B4" part of the performance. The change was made at the time due to difficulty at the time of being able to upgrade the API CH-4 product.

There are no problems with compatibility with the A3/B3 labelled product and any product made from March 2010 meets the below specifications for ACEA A3/B4-2008.

Summary:

HPR DIESEL 5	SAE 5W-40	API CI-4/SL, ACEA A3/B4
HPR DIESEL 15	SAE 15W-50	API CI-4/SL, ACEA A3/B4
HPR DIESEL	SAE 20W-60	API CH-4/SJ, ACEA A3/B3
