TECHNICAL BULLETIN NO. 181

MARCH 2011

NEW HPR 0 – 0W-30 RELEASED

Penrite announces the reintroduction of HPR 0 to fill the market need for low viscosity, full zinc engine oils.

This product is different to the previous available HPR 0 (which became Enviro Plus 0W-40) in the following key ways:

- It is a SAE 0W-30 (the old one was 0W-40)
- It is Full Zinc (like all HPR products)

As such, the new HPR 0 cannot be used in diesel engines with DPF.

HPR 0 has Penrite's "Extra 10", and is recommended where SAE 0W-20 and 5W-20 oils are specified.

The full specifications are:

- API CH-4/SL
- ACEA A3/B4 (may be used where A1/B1 or A5/B5 are required)
- Ford M2C913A and M2C913B

A Quick Reference Application chart is attached.

New HPR 0 will be available by the end of March 2011.
