SUSPENSION FLUID FOR MORRIS/AUSTIN VEHICLES

As you are aware, we have elected to delete from our range the Penrite HYDROELASTIC SUSPENSION FLUID which was used in many Austin and Morris vehicles of the late 50's and 60's.

To the best of our knowledge, no oil company makes an equivalent product.

An approximate product for this application can be made using:

33% by volume Anti Freeze Anti Boil
67% by volume distilled water

Unfortunately, since Penrite have also withdrawn the retail packs of Premium Anti Freeze Anti Boil, this means that end users must purchase a compatible competitor product.

Workshops should preferably use Premium Anti Freeze Anti Boil. PRO Anti Freeze Anti Boil is a second choice.
