

HPR DIESEL 5

APPLICATIONS

When first introduced, HPR Diesel 5 had some a small number of very specific applications.

As time goes on, the number of engines where HPR Diesel 5 is the primary recommendation is increasing and it has also been updated in formulation to further help that expansion. In addition to API CH-4/SL and ACEA A3/B4, it now meets ACEA E4 as required by Iveco and Mercedes Benz for their light commercials.

Many engines were filled with either 5W-30 or 10W-30 initially, so the extra operating temperature viscosity of HPR Diesel 5 5W-40 helps reduce wear and control oil consumption.

The below chart can be used as quick reference guide and includes cars sold in New Zealand and not Australia.

PASSENGER CARS

Audi A6	2004-
Ford Mondeo 1.8D	1997-
Peugeot 306, 406, 407	1999-
VW Golf	1999-

LIGHT COMMERCIALS AND 4WDS

Audi Allroad	2000-
BMW X-5	2002-
Chrysler Jeep Cherokee/Grand Cherokee	2002-
Fiat Ducato	2002-
Ford Courier	1999-
Ford Transit	1997-
